ABDULMOHSIN ALHARBI (201918050)

NEOM

NEOM is a planned futuristic urban project located near the Red Sea in Saudi Arabia. It is designed as a high-tech sustainable urban development that aims to combine technology, renewable energy and innovative design to create a thriving metropolis. The objectives of NEOM include becoming a hub for various industries such as artificial intelligence, biotechnology and tourism, while also focusing on environmental protection. The project is part of Saudi Arabia's Vision 2030 initiative, which aims to diversify the country and its economy and reduce dependence on oil. NEOM development is expected to take several decades and attract significant investment.
